

Elevate Your Impact Through **Innovation and Learning**

Evalueserve is a global leader in delivering innovative and sustainable solutions to a diverse range of clients, including over 30% of Fortune 500 companies. With a presence in more than 45 countries across five continents, we excel in leveraging state-of-the-art technology, artificial intelligence, and unparalleled subject matter expertise to elevate our clients' business impact and strategic decision-making. Our team of over 4,500 talented professionals operates in countries such as India, China, Chile, Romania, the US, and Canada. Our global network also extends to emerging markets like Colombia, the Middle East, and the rest of Asia-Pacific. Recognized by **Great Place to Work®** in India, Chile, Romania, the US, and the UK in 2022, we offer a dynamic, growth-oriented, and meritocracy-based culture that prioritizes continuous learning and skill development, work-life balance, and equal opportunity for all.

Curious to know what it's like to work at Evalueserve?

Role **Information**

Job Title	Managing Technical Architect
Location	United States (Remote with Travel)
Nature of Job	Full Time - Fixed Contract
Department	Data Analytics

About Data Analytics (DA)

Data Analytics is one of the highest growth practices within Evalueserve, providing you rewarding career opportunities. Established in 2014, the global DA team extends beyond 1000+ (and growing) data science professionals across data engineering, business intelligence, digital marketing, advanced analytics, technology, and product engineering. Our more tenured teammates, some of whom have been with Evalueserve since it started more than 20 years ago, have enjoyed leadership opportunities in different regions of the world across our seven business lines.

Click **here** to know more.

What you will be doing at **Evalueserve**

- Lead the development for software and data engineering projects for a key Evalueserve client in the financial services industry
- Define software development standards, methodology and process
- Plan software development sprints and monitor progress with industry standard metrics
- Guide a diverse team of senior and intermediate software developers and data engineers
- Full-range of programming tasks – including problem analysis, solution determination, code design and architecture
- Development, integration, UAT and regression testing and documentation
- Collaborate closely with the multiple Business SMEs, product managers, and senior leadership to understand requirements and propose solutions and roadmaps
- Coordinate with infrastructure teams to define and implement CI/CD processes for solutions
- Troubleshoot/remediate any identified issues
- Jointly work with other teams and partners to handle different aspects of the product creation, reviewing and mentoring

What we're **looking for**

- 7-12 years of experience of working in financial services development
- Experience leading global development teams
- Experience developing secured and high-performance Finance IT applications
- Strong hands-on back and front-end programming experience with React and Node.js
- Data Modeling experience
- Experience with relational databases (SQL Server preferred)
- Experience working with GitHub
- Experience working with Scrum Methodology
- Understanding of data pipelines and ETL/ELT process
- Understanding of CICD processes
- Understanding of Hadoop based data lakes
- Understanding of Snowflake, Databricks, and Power BI
- Familiarity with various operating systems, databases and cloud environments (private and public)
- Understanding of Generative AI solutions
